Quest's Energy Rating Graph Generator upgraded with six new services
Free online tool now includes all residential and commercial Energy Rating graphs for
England, Wales, Northern Ireland and Scotland

Quest, the major IT infrastructure supplier in the HIP, Home Report and Energy Performance Certificate (EPC) markets, has upgraded its free Energy Rating Graph Generator tool with six new EPC graph options that property professionals can use within sales particulars and for online listings.

The toolkit, which is available via www.questuk.com/epcgraph now includes the ability to generate graphs for;

- England & Wales EPC;
- England & Wales Predictive Energy Assessment for new builds;
- England & Wales On-Construction EPC;
- England & Wales Commercial EPC;
- Northern Ireland EPC;
- Scotland EPC; and
- Scotland Predictive Energy Assessment.

James Sherwood-Rogers, managing director, Quest said: "The Energy Rating Graph Generator toolkit is extremely popular with estate agents and pack providers who want to quickly reproduce correctly formatted Energy Rating graphs for use in sales particulars and on websites. It requires no additional software or training and instantly enables any agent to create the required graph in an easy to use format. We have upgraded the toolkit to include the complete range of Energy Assessments for residential and commercial properties across the UK, and are pleased to confirm we will continue to provide access to the online service for free."

The Quest Energy Rating Graph Generator develops approved graphs that property professionals can confidently use. It is important for agents to ensure correctly formatted graphs are used in all marketing particulars so they are not liable under the property mis-descriptions act for presenting incorrect or misleading energy rating data. The Graph Generator also has the ability for 3rd party estate agents software to automatically populate the tool with the graph type values.

Notes to Editors:

About Quest:

Established in 1982, Quest, which is part of Landmark Information Group, is the market leading provider of survey and mortgage valuation software in the UK. Quest has also developed Q-Guard, a fraud detection and prevention tool that supports the industry in combating mortgage fraud.

In addition, Quest also specialises in delivering software applications that allow users to access, develop, collate and share the contents of HIPs, Home Reports, the Energy Performance Certificate and Home Condition Report in a secure electronic environment.

Its technology is integrated with a majority of the DEA accreditation schemes and Scottish Protocols, including RICS and BRE, providing access to the largest resource of assessors for an efficient turnaround.

The company is a founder-member of the Association of HIP Providers.
